### Plate and Frame Heat Exchangers Applications

The Application for Plate and frame Heat Exchangers are designed long time reliable performance. Its a primary heat recovery supplied on Catalytic Products International oxidation equipment. The secondary heat recovery supplied for plate and frame heat exchangers is:

- Heat to be return to ovens, dryers, kilns
- Building heating
- Retrofit/Replace/Repair damaged heat exchangers

**Integrate heat recovery into OEM equipment are:**

Ovens, dryers, kilns, furnaces

**Customized Types Solutions Including**

- High thermal efficiencies
- Corrosive air streams
- Cooling applications
- High Temperatures

**Plate and Frame Heat Exchangers Applications**

- Specialized metallurgy based on needs of application
- Clean-out doors for particulate cleaning
- Multiple layout configurations to help offer a convenient layout
- Flanged connections
- Insulated housings
- Skid mounting with blowers controls and instrumentation
- Pharmaceutical
- HVAC Industry
- Food and Beverage
- Marine Industry
- Automobile Industry
- Primary heat recovery
- Secondary heat recovery
- Integrate heat recovery into OEM equipment
- Customized solutions including
- High thermal efficiencies
- Corrosive air streams
- Cooling applications
- High Temperatures
